IMPORTANT:

The “Suites Included” will affect the menu. If you can’t find the building you’re looking for, try resetting the switch.

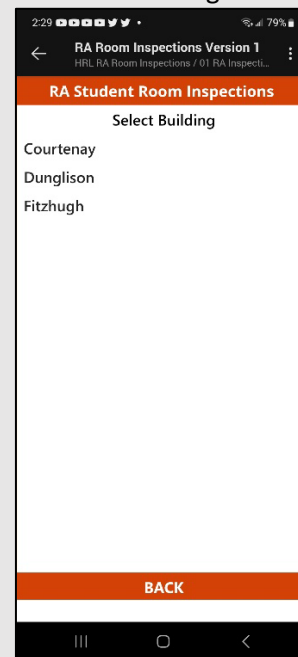

About the “Suites Included” Switch [True]

Example View of Suites Included = True

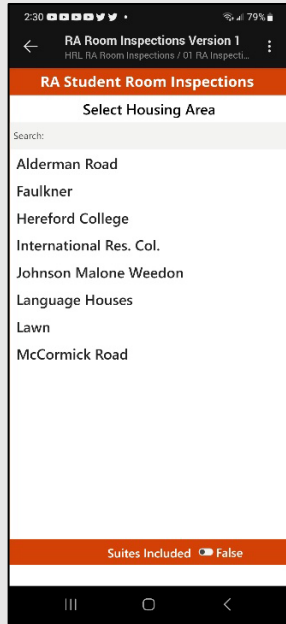

View After Selecting Alderman

About the “Suites Included” Switch [False]

RA Inspections App: using PowerApps for RA Inspections

Example View of Suites Included = False

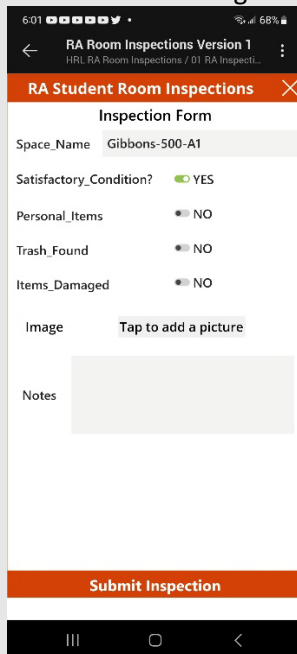

View After Selecting Alderman

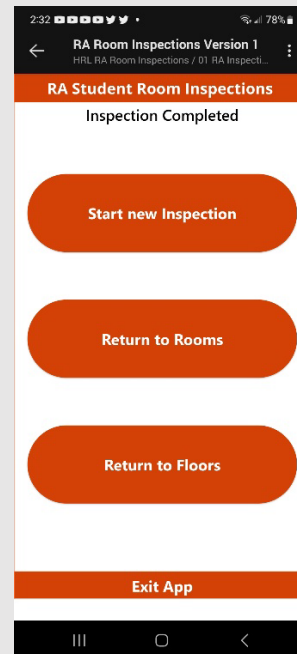

Entering Multiple Inspections

Example View of Inspection Form
The default Condition is good = YES

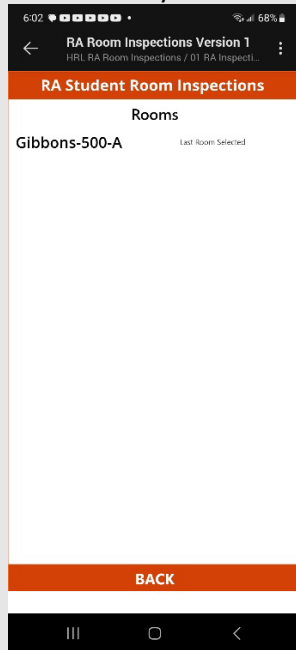

View After Submitting. If there is another bedroom to inspect, select Return to Room or another option.

RA Inspections App: *using PowerApps for RA Inspections*

If choosing Return to Rooms [or Floors]: A note appears to confirm your last selection.

Notice after selecting the last room, the inspected Bed is noted, helping to reduce duplications.

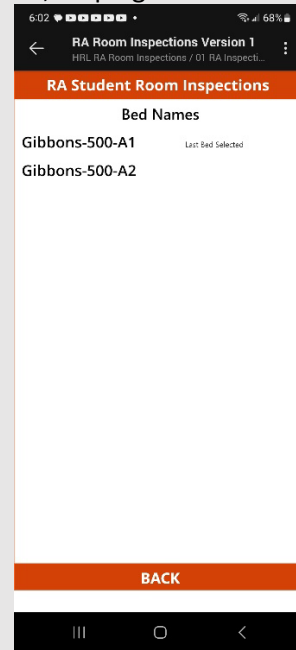

Photo Required

RA Inspections App: using PowerApps for RA Inspections

The screenshot shows the 'RA Room Inspections Version 1' app interface. At the top, there is a notification bar that says 'PHOTO REQUIRED' in red text. Below this is the title 'RA Room Inspections Version 1' and a subtitle 'HRL RA Room Inspections / 01 RA Inspecti...'. The main form is titled 'Inspection Form' and contains the following fields:

- Space_Name: Gibbons-500-A2
- *Satisfactory_Condition?: NO
- Personal_Items: NO
- Trash_Found: NO
- Items_Damaged: YES

Below the form fields, there is a section for 'PHOTO REQUIRED' with a sub-label 'Image' and a button that says 'Tap to add a picture'. Underneath is a 'Notes' field with a light gray background. At the bottom of the form is a prominent orange button labeled 'Submit Inspection'. The app is running on an Android device, as indicated by the navigation bar at the very bottom.

If any switch is moved to “YES” a reminder will pop up stating a photo is required. The app will not allow submissions without a photo.

Notice: Changing ‘Items Damaged’ as shown, or any items to “YES” automatically sets, ‘Satisfactory Condition?’ to “NO” and triggers the reminder message.

Adding Notes:
Notes are optional but encouraged.
